	rironmental factors have a great effect on audible ranges.	
A.	The following are some factors which will cut the audible range down:	
	(a) Thick under brush (b) A hill between potential observers	0.0
	(c) Daytime temperature gradients	25
	(d) Wind noises	
-	(e) Animal noises	
B.	Factors which would increase audible distance are the following:	
	(a) Hard surfaces, such as water and bare, hard ground	
	(b) A valley between observer	25
	(c) Night-time temperature gradients (d) Down wind listening
